		water will be treated and reused 100%. Zero discharge will be maintained outside the premises. STP is proposed for the treatment of domestic contaminated water, out of which the treated water will be processed for reuse / greenbelt / quenching / dust suppression. Soil Pollution: Impact on farming is not envisaged. However, if there is any damage to farming/agriculture due to our project, then the company will help in its compensation. Training program will improve the proposed surrounding agriculture and improve the quality of their product
